April, 2026

Day 19 – UI Refinement and Poster Design

1. Objective of the Day

The objective of the day was to refine the overall user interface of the application and continue designing posters for live projects.

2. Tasks Performed

- Reviewed entire application UI for inconsistencies
- Improved alignment, spacing, and layout across different components
- Enhanced visual hierarchy for better readability
- Refined dashboard and navigation elements
- Fixed minor UI issues observed during usage
- Ensured consistent design across all application screens
- Designed posters for live projects using Canva
- Improved layout balance and visual appeal in poster designs
- Maintained consistency in branding, fonts, and color schemes

3. Tools / Technologies Used

- Angular Framework
- Angular Material
- Canva

4. Key Learnings

- UI refinement improves overall user experience
- Consistency in design enhances usability
- Small UI improvements have significant impact
- Reviewing application helps identify hidden issues
- Canva helps maintain high-quality visual output

5. Challenges Faced

- Identifying subtle UI inconsistencies across different components
- Maintaining uniform design throughout the application

6. Solutions

- Conducted detailed UI review across all pages
- Applied consistent design standards throughout the application

7. Conclusion

- Successfully refined application UI for better usability
- Continued enhancing poster designs with improved visual consistency
