April, 2026

Day 7 – Folder System Implementation and Poster Design

1. Objective of the Day

The objective of the day was to implement a folder system for organizing notes and continue designing posters for live projects.

2. Tasks Performed

- Implemented functionality to create folders in the application
- Designed UI for displaying folders in the dashboard
- Linked notes to specific folders for better organization
- Stored folder data in Firestore database
- Implemented logic to display notes based on selected folder
- Tested folder creation and note assignment functionality
- Designed posters for live projects using Canva
- Improved layout structure and spacing in poster designs
- Ensured consistency in color schemes and typography

3. Tools / Technologies Used

- Angular Framework
- Firebase Firestore
- AngularFire
- Canva

4. Key Learnings

- Folder systems help organize large amounts of data efficiently
- Linking related data improves usability
- Firestore supports structured data relationships
- UI design plays a key role in user experience
- Canva helps maintain consistent visual design

5. Challenges Faced

- Managing relationships between folders and notes
- Ensuring correct display of notes within selected folders

6. Solutions

- Used structured data mapping between folders and notes
- Tested folder selection and filtering logic thoroughly

7. Conclusion

- Successfully implemented folder system for note organization
- Continued improving poster designs with consistent styling
